

## Triad jigsaw activity

A jigsaw activity is a way for you to share information with your classmates and learn more about a topic. You will put your learnings together like a jigsaw puzzle. There are three steps:

1. Complete the reading or task you are assigned.
2. Meet with your other 2 triad members who completed different readings or tasks. Present your key takeaways to them and answer their questions.
3. Talk and take notes about what you learn from your peers.

Write the name of your reading or task here:

---

Take notes on your reading or task here:

Name: \_\_\_\_\_

Class: \_\_\_\_\_ Date: \_\_\_\_\_

Use the space below to record notes from your other triad members.

|                                                                                           |                                                                                           |
